

Dr GREGORY PRATT: Short CV for Conference

Gregory qualified as a General Practitioner in 1995 at Pretoria University and after 10 years in private practice, completed an MBA and then joined Medscheme, providing advisory services to a number of their corporate and open schemes. He has been involved with forensic investigations for many of the schemes in the Medscheme stable since 2007 and has pursued this interest over the last decade.

This career path has further motivated him to achieve the internationally recognized qualification of Certified Fraud Examiner through a US institution – one of very few medical practitioners to achieve this. In his current role as clinical advisor to the Medscheme Forensics unit, he is passionate about eradicating fraud in the healthcare industry and is continually looking for collaborative ways to achieve this.

On the home front, he is married with 2 children nearing the teenage years and enjoys cycling as a means to clear the mind!
